Y04 **You** will **quickly** get used to _____ this new digital camera.

- A. use
- B. using
- C. be ran

[答案]B

Y05 **You** _____ the Inception, since I remember once you discussed its main plot with Cathy.

- A. could have watched
- B. should have watched
- C. must have watched

[答案]C

第三大题 阅读理解选择题

A01 **According to experts**, the advantage of modified food is that it helps in preventing the occurrence of allergies and also has a long shelf life. However, a major portion of the population is against the consumption of genetically modified food and is concerned about its disadvantages. If you are also confused about the consumption of genetically modified food, read through the pros and cons given below and decide for yourself.

Advantages of Genetically Modified Foods

- One of the most prominent advantages of genetically modified food is that it helps in controlling the occurrence of certain diseases. Certain foods cause allergy to people. Their genetic modification alters the DNA system of these foods, thereby making them non-allergic.
- Another major advantage of such type of foods is that they grow faster than their traditionally grown counterparts. As a result, there is greater productivity and more food.
- A person need not bother about any additional costs, such as buying chemicals and pesticides, when it comes to genetically engineered food. The food is naturally pest-resistant.
- Farming these foods can be a great way to fight world hunger. Since these crops grow faster or more effectively, increased production would help countries wherein crops may not normally prosper because of less than desirable environmental conditions.
- The increased shelf life of these food products helps in reducing the quantity of rotten food.

Disadvantages of Genetically Modified Foods

- The biggest disadvantage of genetically modified food is that they have harmful effects on the human

body. The consumption of these genetically engineered foods can lead to development of diseases that are immune to antibiotics.

- Chances of developing cancer are high in people who regularly consume engineered food.
- Since it is an unnatural way of producing foods, there is an increased health hazard such as allergens, transfer of antibiotic resistance markers and unknown effects.
- Since the production of engineered food involves infusing animal genes in the crops and tampering with nature, it might not be good for consumption in the long run.

21. How does genetically modified food control the occurrence of certain diseases?

- A. By cross-pollinating.
- B. By conventional crossbreeding.
- C. By altering the DNA system of these foods.

[答案]C

22. Do farmers need to buy any chemicals and pesticides if they plant genetically modified food?

- A. Yes, they need to. Because the food is not resistant to pests.
- B. No, they don't need to. Because the food is naturally pest-resistant.
- C. No, they don't need to. Because the chemicals and pesticides are provided by the government.

[答案]B

23. Which statement is not the advantage of genetically modified food?

- A. It may have harmful effects on human body.
- B. Genetically modified food grows faster than their traditionally grown counterparts.
- C. Farming genetically modified food can help fight world hunger.

[答案]A

24. What would happen to a person if he regularly consumes genetically modified food?

- A. He would get cold.
- B. He would lose some weight.
- C. He would have cancer.

[答案]C

25. Which of the following would be the best title for this passage?

- A. Can Genetically Modified Foods Combat World Hunger?
- B. Genetically Modified Food: Our Answer Is No.
- C. Genetically Modified Foods: Pros And Cons

[答案]C

C01 Climate change has caused a rise in sea levels. This has increased {A. an amount of; **B. the amount of**; C. a number of} salt in fresh water used on coastal farms. As a result farmers are increasingly {**A. unable**; B. able; C. possible} to use fields close to the sea.

Scientists call this process salinization which means a mixture of salt and water. Salinization is reducing the world's irrigated lands {A. to; **B. by**; C. at} 1 to 2 percent every year.

But a farmer in the Netherlands is now using a mixture of sea and fresh water to grow healthy and tasty vegetables. Marc Van started with an {A. investment; B. examination; **C. experiment**}. We put in a lot of plants in the fields and then we put in, put them in fresh water and in sea water and all the varieties between it, and then we see which variety is surviving and which variety is {A. living; B. dead; **C. dying**}.

H01

A.Maybe they were polluted in your hospital.

B.so I will stop all orders with your company.

C.This is the first time we've received a complaint of this nature.1374

D.they will be returned to your factory immediately.

E.it's your job to do that,no tours.

Henry: Good afternoon!Lucy,I am telling you something urgent.We have found several cases of golden staph infected in our patients.They were caused by your products.

Lucy: Are you sure?Our bandages are very safe.[答案]C

Henry: I know that,But only patients who have used your bandages are infected.

Lucy: All of our products were made with the utmost care.[答案]A And why didn't you put the bandages into the sterilizer before you used them?

Henry: Lucy,[答案]E.I've already asked the hospital to do are-examination of your supplies right now.

Lucy: Henry,you're making things difficult,

Henry: The safety of our patients is most important,[答案]B

Lucy: But I have already posted your recent order.They are now on the way.

Henry: Sorry,Lucy.As soon as they arrive,[答案]D

I01 I am very happy to share my story about breast enlargement in Thailand.Anyone who is not sure about breast enlargement should read this story first.

Firstly,I was amazed at the level of care I received at the Thailand private hospital.It was like being in a luxury hotel.The nursing staffs were also better than those who I have ever met in all my years in America.Not only were they professional,but kinder and more patient than Western nurses.

The hospital food was excellent,so I was able to choose from a large and varied Menu.In my private room,there was cable T.V.,a fridge,a phone,and impressive views of Bangkok(曼谷).My Translator was able to communicate with me,and the plastic surgeons arranged the whole operation without me lifting a finger.

The operation cost me a third of the price of the U.K.With the low cost of the air tickets and a holiday,it worked out at about half UK's price,because the cost in Thailand is so cheap.

Combining a plastic surgery with a holiday in an amazing place is an unforgettable experience.From the moment I arrived in Bangkok airport,I felt relaxed and welcomed by the Plastic Surgery & Holiday team,it made me feel that I had friends here already.

1. Where did the author have her breast-enlargement operation?

A. In Thailand.

B. In America.

C. In U.K.

[答案]A

2. Was the author satisfied with the nursing staffs for her?

A. No, because they were no better than America nurses.

B. Yes, because they were more patient than Western nurses.

C. No, because the care was very poor.

[答案]B

3. Which of the following statement is TRUE?

A. The author was content with the food in the hospital.

B. When the author was in the hospital, she lived in a public room.

C. There was cable T.V., a bridge and a phone in the author's room.

[答案]A

4. What does the underlined phrase lifting a finger mean in paragraph three?

A. Doing something with only one finger.

B. Helping with something.

C. Carrying something.

[答案]B

5. Why did the author think her experience unforgettable?

A. Because she had an operation there.

B. Because she was satisfied with everything there.

C. Because she was satisfied with the service and price there.

[答案]C

I02 If you want your product description appealing and informative, write your article linking features and benefits first. It's often not enough to just list the features of a product as your audience may not always understand them. Use {A. description; **B. descriptive**; C. described} language to convey how any one feature will benefit the buyer and {**A. how**; B. what; C. who} purchasing the item will make the consumer's life easier. Potential buyers want to know what the product will do for them. Second, use clear and decisive language. It's important when writing product descriptions to be concise. Use common language and terms that are easy to {A. remember; B. write; **C. understand**}. Clearly describe the product without {A. to get; B. get; **C. getting**} too technical or boring so the reader stays engaged. Last but not the least, include a call-to-action. The best product descriptions always {A. ask to; B. ask for; **C. asking**} a sale. Be creative and encourage the potential buyer to purchase your product by telling them exactly how to do it.

I03 In the grass, a baby duck was hatched (孵化) out in a college biology lab with a backward left foot. At the time, it probably wouldn't have survived, if Mike Gary didn't recommend a proper operation to cut off that bad foot.

Months after the healing process, engineers at Novacopy Company produced a 3D printed model that would be used to create a prosthetic (修复的) foot for the duck. Considering that ABS plastics were not flexible enough for this type of exercise, the Novacopy company made a three-dimension ally modeled foot made of silicone, with the hope to create a permanent prosthesis (假肢) for the duck.

It took just 13 hours to produce. This 3D prosthesis demonstrated the 3D technologies can be used not only for human application, but also in foreign subjects such as animals and other medical treatments.

1. Where was the baby duck hatched out?

- A.In a college biology lab.
- B.In a back yard.
- C.In Noacopy Company.

[答案]A

2.What was wrong with the baby duck?

- A.It didn't survived.
- B.It was born with a backward left foot.
- C.Mike Gary cut off that bad foot.

[答案]B

3.Could ABS plastics be used to produce a 3D printed model that would be used to create a prosthetic foot for the duck?

- A.No,because ABS plastics were not flexible enough.
- B.Yes,but it could only be produced by Novacopy Company.
- C.Yes,because it was made of silicone.

[答案]A

4.How long did it take to create a permanent prosthesis for the duck?

- A.10 hours.
- B.13 hours.
- C.30 hours.

[答案]B

5.What did the last sentence of this passage indicate?

- A.3D technologies can be used only for human application.
- B.3D technologies can be used only for foreigners.
- C.3D technologies can be used to human,animals and other medical treatments.

[答案]C

M01 My hero is a person who has given me so many things,who has taught me about everything,and who has shown me how beautiful life is.And gradually as I get older and I grow up,my hero has opened my eyes to the fact that life is not always beautiful and happy like a fairy tale,but life is much more than that.My hero has explained to me that life can be very hard.Everyone must struggle hard to make all their dreams come true and to be a successful person.

Maybe,because my her olives so close to me,I haven't realized that this person has inspired me so much.My only true heroism y mother.She was born in Jakarta,on the 1st of July.My mother is the youngest child in her family.She has two sisters,who always love and take care of her.Maybe,because of that,she becomes a cheerful,kind,friendly,and love able person.She wants everybody to feel comfortable when they are around her. My mother likes to study and to read everything,from books to newspapers.Everyone really likes to talk and chat with her,so she has many friends.My mother believes all you need is to be a hard-working person who always wants to study hard,so that you can be a successful person.She says that many people around her have succeeded because they have studied and worked hard.

21.If a person wants to succeed in his life,he_____.

- A.should listen to a fairy tale everyday
- B.must dream a good dream everyday
- C.has to work hard all his life

[答案]C

22.The underlined word“inspired”in Paragraph 2may have the same meaning as“_____”.

- A.encouraged
- B.showed
- C.cared

[答案]A

23.The writer's mother becomes a love able person because

- A.she is the youngest in the family
- B.her two sisters love her very much
- C.she feels comfortable in her family

[答案]B

24.From the third passage,We can infer(推测) that the writer_____.

- A.is a friendly person like his mother
- B.has many friends to talk with
- C.knows the meaning of success

[答案]C

25.Which of the following is the best title for the reading?

- A.Study well!
- B.What a beautiful life!
- C.My mother,my hero.

[答案]C

R01 Roby Mini is just 40 centimeters tall,has a large round screen for ahead and has been designed to help senior citizens living alone.

Manufactured by robotics company Shanghai PT Info,the brightly colored robot,which costs 5,000yuan(\$790) ,was launched on Aug 14 to help entertain and monitor elderly people.

In Shanghai last year,the number of registered residents at least 60 years old was 4million.That was nearly 30 percent of the population.By 2018,the figure is projected to rise to 5 million.With many living alone,robots such as Roby Mini can help play a crucial role in caring for the elderly.“It will change the way people interact with digital products,”Hong says.

Founded in May,Shanghai PT Info had already done the groundwork.In fact,the research team spent three years developing the speech recognition system before the firm was officially launched.

With 360-degree wheels hidden under its body,Roby Mini can follow a person through face recognition and strike up a conversation,tell jokes or provide information.

The robot also works as a computer terminal,supplying weather information,ordering groceries online and even booking taxis.Roby Mini can be connected to other gadgets as well,such as smart wristbands or magnetic devices on doors.

Roby Mini can also connect an elderly owner to a doctor through its high-definition screen.Already Shanghai PT Info is talking to three community hospitals in Shanghai's Min hang district.Since the robot is linked to the Internet,it can support long-distance audio and video calls.

Mass production started this month and Shanghai PT Info plans to manufacture 200,000units this year.

But the future is not easy for Shanghai PT Info.Earlier this year,Flying wings Intelligent Robot Technology(Shanghai) introduced a machine with sensors that will ring an alarm when an elderly person falls down.Tianjin Shangjiu Sheng yuan Technology Group also developed a robot for seniors in 2014.Owners can turn on the lights and air-conditioning units by pressing buttons on the machine.It can also remind elderly owners to take pills,and inform them of hospital checkups and family birthdays.

21.Roby Mini is the name of_____.

- A.a robotics company

- B.a robot
C.a senior citizen living alone

[答案]B

22.Roby Mini is designed to_____.

- A.help look after children living alone in senior high school
B.help entertain and monitor senior citizens
C.change the way people interact with digital products

[答案]B

23.According to this passage,the number of registered residents at least 60 years old will be_____.

- A.4 million next year
B.30 percent of the population
C.increase to 5 million by 2018

[答案]C

24.The writer thinks“the future is not easy for Shanghai PT Info”because_____.

- A.there are too many elder people in Shanghai
B.Roby Mini can not ring an alarm when an elderly person falls down.
C.the company will face tough competition in the marketplace

[答案]C

24.The writer thinks“the future is not easy for Shanghai PT Info”because_____.

- A.there are too many elder people in Shanghai
B.the company will face tough competition in the marketplace
C.Roby Mini can not ring an alarm when an elderly person falls down

[答案]B

25.The best title for this passage would be“_____”.

- A.How to Use a Robot
B.Elder People Increase in Shanghai
C.Robot Gives Help to Older People

[答案]C

S01 Something else that could be coming soon to a vehicle near you.More technology.The kind that could help your car talk to others around it.{A.Like;**B.Unlike**;C.Unlikely}some proposed cars of the futures it would not actually do the driving for you.But it could warn you about what other drivers are doing.The U.S.government may require this feature in the future,but it would{**A.add to**;B.reduce;C.cut down}the cost of the car.

It's the vehicle of the future,cars that talk to the driver and each other.The U.S.government wants it on the road soon,{A.pushing up;**B.pushing for**;C.pushing on}technology that would warn drivers of danger coming from any direction.

It's called vehicle to vehicle technology.Cars would send wireless message to each other{A.from;B.beyond;**C.within**}about 300-yard.Communicating information like speed,direction and GPS position ten times per second.When cars share this information,they can{A.account of;B.account to;**C.account for**}all the vehicles around them,which means they are able to identify possible crashes.

T01 Tessera Multimedia was founded in 1997 and specializes in design and{**A.development**;B.develop;C.developed}of web,multimedia and mobile applications.

With headquarters in Thessaloniki,Tessera has developed business activities covering the whole Greece and has developed a significant partner network and a large customer base{**A.by**;B.on;C.with}investing in long-term relationships of trust and reliability.

Our company has designed and successfully implemented a significant number of complex software{A.projection;B.project;**C.projects**}in a wide range of sectors.Tessera has gained exceptional experience in designing web sites and portals,educational games,e-commerce applications and mobile apps.

Tessera seeks to be always{A.keep in touch;**B.up to date**;C.contact}with current trends and advancements in software technology,constantly investing in new technologies and human resources.

The development department consists of{A.new;**B.qualified**;C.temporary}staff ensuring high quality,integrated services.At the same time,our personnel is trained systematically in deploying new technologies,aiming that our productions are always on the cutting edge of technology.

W01 When computer servers operate a complex program,they can get very hot.Cooling the servers can be costly.So researchers asked what would happen if the heat created by the servers could be captured and used?

Data centers of large Internet companies such as Google and Microsoft have thousands of computer servers.As these servers process information,they create large amounts of heat,so they need huge cooling systems,These systems send the heat into the air.

The Dutch company Nerdalize thinks paying for electricity to operate the servers and then paying again to cool them is a waste of energy.So it developed a device called the e-Radiator.It is a computer server that also works as a heating source.Boaz Leupe is the chief executive officer of Nerdalize,He says the e-Radiator saves money because companies don't have to pay to cool their servers.

“The kilowatt(千瓦) hour you are using is used twice-once to heat the home and once to compute the client's task without the cooling overhead.”He says five homeowners in the Netherlands are testing the heating device in their homes.“We reimburse the electricity the server uses,and that we can do because of the computer clients on the other side,and,in that way,homeowners actually get heating for free,and computer users don't have to pay for the overhead of the data center.”

Jan Visser is one of the participants in the year-long experiment.He says the amount of heat produced by the e-Radiator into room depends on the work being done by the computer server.He says it can not be used as the primary source of heat.But he is ready to try it.

He says if it provides enough warmth,he will be able to use his home's heating system less,which will save him money.Nerdalize says e-Radiators create heat temperatures of up to 55°C.It says the devices could save users up to \$440 in heating costs a year.

21.Why did researchers ask what would happen if the heat created by the servers could be captured and used?

- A.Because computers can get very hot.
- B.Computer servers is a complex program,
- C.Cooling computer servers costs a lot of money.

[答案]C

22.The computer servers in large Internet companies such as Google and Microsoft can_____.

- A.create large amounts of information
- B.create large quantity of heat
- C.manage the huge cooling systems

[答案]B

23.Nerdalize developed the e-Radiator because_____.

- A.e-Radiator cost less energy
- B.e-Radiator can cool the servers for free

C.e-Radiator can create cold air for free

[答案]B

24.According to Jan Visser,the amount of heat produced by the e-Radiator_____.

A.depends on the work being processed by PC

B.can not be used as the home's heating system

C.can not be used as the main source of heat

[答案]C

25.The best title for this passage would be“_____”.

A.The New Way to Heat Homes

B.The New Way to Cool Homes

C.Hot Computers Could Be Used for Free

[答案]A

第四大题 阅读理解判断题

B01 Baidu,China's leading search engine company,has unveiled its own eyewear called Baidu Eye.It is said to be a different product from Google Glass in terms of functionality.

The company demonstrated a working prototype on September 3 at its annual Technology Innovation Conference in Beijing.It bears a similarity to Google Glass,but it has no screen.Instead,the device uses a camera to scan objects,and focuses on analyzing information around its user and beaming that to a smart phone.

Baidu says the device is designed to support image search.The company's CEO Robin Li believes in five years' time,people will get used to searching by image and audio rather than text,Li has given an example of how one can take advantage of Baidu Eye,“If you are in a shopping mall and come across a woman whose skirt looks really attractive,you take a photo of her skirt using Baidu Eye,and you'll get to know where to buy one for yourself.”

According to Kaiser Kuo,Baidu's director of international communications,Baidu Eye can also recognize voice and gesture,“You can use voice commands,or gesture commands-like expanding to zoom,or circling an object in your field of view with your finger.”

Baidu is yet to announce a release date or marketing plans for Baidu Eye.

26.Baidu is China's leading search engine company.[答案]T

27.Baidu launched a product that has more functions than Google Glass on September 3.[答案]F

28.Baidu Eye can scan objects with its small screen.[答案]F

29.The company's CEO Robin Li believes that people will get used to searching by text.[答案]F

30.Baidu has already announced the release of Baidu Eye.[答案]F

E01 Engineers who build and program robots have fascinating jobs.These researchers tinker(修补)with machines in the lab and write computer software to control these devices.“They're the best toys out there,”says Howle Choset at Carnegie Mellon University in Pittsburgh. Choset is a roboticist,a person who designs,builds or programs robots.

When Choset was a kid,he was interested in anything that moved-cars,trains,animals.He put motors on Tinkertoy cars to make them move.Later,in high school,he built mobile robots similar to small cars.

Hoping to continue working on robots,he studied computer science in college.But when he got to graduate school at the California Institute of Technology in Pasadena,Choset's lab mates were working on something even cooler than remotely controlled cars: robotic snakes.Some robots can move only forward,backward,left

and right. But snakes can twist (扭曲) in many directions and travel over a lot of different types of terrain (地形). “Snakes are far more interesting than the cars,” Choset concluded.

After he started working at Carnegie Mellon, Choset and his colleagues there began developing their own snake robots. Choset's team programmed robots to perform the same movements as real snakes, such as sliding and inching forward. The robots also moved in ways that snakes usually don't, such as rolling.

Choset's snake robots could crawl (爬行) through the grass, swim in a pond and even climb a flagpole.

But Choset wondered if his snakes might be useful for medicine as well. For some heart surgeries, the doctor has to open a patient's chest, cutting through the breastbone. Recovering from these surgeries can be very painful. What if the doctor could perform the operation by instead making a small hole in the body and sending in a thin robotic snake?

Choset teamed up with Marco Zenati, a heart surgeon now at Harvard Medical School, to investigate the idea. Zenati practiced using the robot on a plastic model of the chest and they tested the robot in pigs.

A company called Med robotics in Boston is now adapting the technology to surgeries on people.

Even after 15 years of working with his team's creations, “I still don't get bored of watching the motion of my robots,” Choset says.

26. Choset began to build robots in high school. [答案] T

27. Snake robots could move in only four directions. [答案] F

28. Choset didn't begin developing his own snake robots until he started working at Carnegie Mellon. [答案] T

29. Zenati tested the robot on people after using it in pigs. [答案] F

30. The robotic technology for surgeries on people has brought a handsome profit to Med robotics. [答案] F

H01 Here's a crazy idea: Combine bioprinting and tissue engineering to “print” animal products and tackle some of the planet's biggest problems. Animal farming, after all, accounts for about half of all human-caused greenhouse gases, taking place on one-third of the available, non-frozen land on Earth. All to feed people's appetites for 300 million tons of meat a year,

Modern Meadow is a Missouri-based start up that engineers tissues to create lab-grown edible meat, in a process that eliminates many of the negative environment effects associated with traditional livestock practices.

The company claims that by carefully layering mixtures of cells of different types in a specific structure, in-vitro meat production becomes feasible. It's set a short-term goal of printing a liver of meat around two centimeters by one centimeter, and less than half a millimeter thick, which is edible.

The company explains in a submission to the United States Department of Agriculture: “The technology has several advantages in comparison to earlier attempts to engineer meat in vitro. The bio-ink particles can be reproducibly prepared with mixtures of cells of different type. Printing ensures consistent shape, while post-printing structure formation and maturation in the bioreactor facilitates conditioning.”

However, it admits that the road ahead is strewn with difficulties. “The consumer acceptance of such products may not be without challenges. We expect it will first appeal to culinary early-adopter consumers and the segment of the vegetarian community that rejects meat for ethical reasons. With reduction in price, it can reach the masses with religious restrictions on meat consumption (people restricted to Hindu, Kosher, Halal diets) and finally populations with limited access to safe meat production.”

Whatever the final outcome,lab-grown edible meat is no longer in the realm of science fiction.It is coming.

26.Animal farming is responsible for the occurrence of greenhouse gases.[答案]T

27.Modern Meadow is a newly-started business which aims to make profits by producing lab-grown edible meat.[答案]F

28.The method Modern Meadow adopted to produce in-virto meat is by layering mixtures of cells of different types in a specific structure.[答案]T

29.There is no meat engineered outside living bodies before.[答案]F

30.This lab-grown meat has already widely received by the masses.[答案]F

S01 Something else could becoming soon to a vehicle near you: more technology,the kind that could help your car talk to others around it.Unlike some proposed cars of the future,it would not actually do the driving for you.But it could warn you about what other drivers are doing.The U.S.government may require this feature in the future,but it would add to the cost of the car.

Vehicles of the future could be cars that talk to the driver and each other.The U.S.government wants them on the road soon,pushing for technology that would warn drivers of danger coming from any direction.

It's called vehicle-to-vehicle technology.Cars would send wireless messages to each other within about 300 yards,communicating information like speed,direction and GPS position ten times per second.When cars share this information,they can account for all the vehicles around them,which means they are able to identify possible crashes.

The technology sees around corners,over hills and through other vehicles.For example,my car will tell me that there are five cars just ahead of me,and I can slowdown beforehand while the vehicle ahead sends my car a message giving me enough time to react.

33,000 Americans are killed and 2.3 million injured in car crashes every year.The Department of Transportation(Do T)predicts,talking cars could prevent up to 80 percent of crashes involving sober drivers. Five major car companies have been working with Do T on developing and testing the technology.3,000 cars are already using it as part of a government pilot test.Some time after 2016,the U.S.government hopes your car will be able to communicate with you.

While Do T hopes to make this technology the rule by 2016,it will still need the public to weigh in before anything is finalized.Now,as for privacy,the government says that data sent between cars doesn't record personal information,so your privacy should not be compromised.

26.According to the passage,the future vehicles can let the drivers see the area behind the car.[答案]F

27.According to the passage,the future vehicles can tell you about what other drivers are doing.[答案]T

28.The government is pushing for technology that would warn drivers of danger coming from any direction.[答案]T

29.The government is pushing for technology that would not increase the cost of the car.[答案]F

30.The cars would send text messages to each other within about 300-yard.[答案]F

T01 The printer did not always manage to spread the plastic evenly,making some of the ribs of the honeycomb structure of the block uneven,reported ARN (Australian Radio Network) to the surprise of no one who has used a 3D printer.But the architects remain optimistic.The first few printed blocks are meant to be test pieces as they improve the process.

It takes about a week to print a 3-meter high block right now. The project's leaders hope to eventually get that down to two hours and finish the first of 12 rooms in a year, and the entire house in less than 3 years.

Ultimately, 3D Print Canal House is an architectural research project, one that is very much being conducted in the public eye: you can actually buy tickets to visit the construction site for 2.50 Euros.

The top floors will become more ornate, for example, as newer techniques are incorporated. They'll explore the possibilities of 3D printing, like the honeycomb walls or an entire room recycled, redesigned, and built anew. Nobody's going to move into a 3D printed house soon, but, if anyone ever does, something might be learned from this experiment by the canal.

1. According to the passage, the 3D printer can type with plastic evenly. [答案] F
2. This 3D printer printed some blocks to test its work. [答案] T
3. The project's leaders will finish the entire house in less than 3 years. [答案] F
4. 3D Print Canal House is printed to live. [答案] F
5. The canal house will be decorated more. [答案] T

W01 With a teeny waist, exaggerated breasts, icy-blue eyes, 21-year-old Valeria says she is the real natural deal. A real-life Barbie, that is.

That's what she claims anyway, but many people doubt her claims. Whether she underwent plastic surgery or uses Photo shop remains unclear. On her blog, the model notes that she is the most famous woman on the Russian Internet because of her doll-like appeal. Hundreds of photos on her Facebook page show a wide-eyed, nearly fake-looking Valeria posing in a variety of outfits.

The model did not return requests for comment. If Photo shop is not a factor in getting Valeria's look, she likely underwent a barrage of plastic surgery. The president of American Society of Plastic Surgeons (ASPS) said, plastic surgery should never be used to transform oneself into a favorite celebrity or, in this case, a play toy. He also warns patients to keep in mind that plastic surgery is real surgery with real risks, just as with any operation, so the decision should not be taken lightly.

26. Valeria thinks that she is a real-life Barbie. [答案] T

30. The president of ASPS thinks that plastic surgery is of risks. [答案] T

第五大题 写作题

根据要求写作文---【写一篇作文】

根据要求写作文。

以 My Favorite Sport 为题写一篇作文, 要求包括以下内容:

- (1) 介绍一项你特别喜欢的运动;
- (2) 说明你喜欢这项运动的理由。

参考答案一:

My Favorite Sport

MY favourite sport is basketball. Playing basketball can make me stronger and stronger. And keeping playing it can make my basketball skills better. Playing basketball is not only very interesting but also helps me make

many friends.

I enjoy playing basketball with my friends.Kobe Bryant who is an NBA player is very powerful.He is regarded as the best player in American basketball world.I hope I can have a chance to see an NBA game in person.I wish I can play basketball with Kobe Bryant one day.

参考答案二:

My Favorite Sport

My Favourite sport My favourite sport is basketball as it is very exciting.I like basketball because the NBA stars play very well.Basketball is very cheap and it is a good sport for our health.We can grow taller if we play basketball often.Also it keeps me fit.I play basketball three times a week.Most often I play it in my school.I often play it with my friends although I may play it myself I feel very happy when I play basketball in school with my classmates.

Sometimes I play basketball in the playground near my home.Basketball is very easy to play.If you play basketball very well,you can form a basketball team to take part in the competition.If you win the basketball competition,you will have the prize.You may become a famous basketball star.

参考答案三:

My Favorite Sport

My favourite sport is playing badminton. It is a very popular game and both of the young and the old can play it.There are many kinds of ways to play it,such as men's singles,women's singles,men's doubles,women's doubles and fixed doubles.

It isn't as easy as it seems to play because you have to know how to run the pace,how to hit the badminton.You must learn about many things about badminton.

I have a badminton training class on Tuesdays,Thursdays and Saturdays.We drill very hard and always feel tired after an hour.

I see many badminton matches and know some famous badminton players,I want to be a famous one too.

I like playing badminton very much.

根据要求写作文---【写一份调查报告】

[试题一]

根据要求写一篇 80 词左右的作文。

The form below illustrates reading preference based on a survey of 200 college students in 2020 in China.Write a survey report based on the given information.

(以下表格是 2020 年对中国 200 名大学生的阅读偏好所进行的调查,根据所给信息写一份调查报告。)

课外阅读书籍类型	所占百分比
文学类书籍	30%
娱乐类书籍	27%
应用技术类书籍	20%
专业用书	15%
科普读物	8%

Your report should include:

- (1)The subjects and respondents of the investigation.
- (2)Analysis of investigation result.
- (3)Your opinion or suggestions about college students' reading.

参考答案:

A Survey Report on College Students' Reading Preference

1. Investigation time

December 2020.

2. Objects of investigation

200 college students at the National Open University Pingdingshan campus.

3. Analysis of survey results and recommendations

After several days of investigation and practice, I have a further understanding of the reading preferences of college students. Through statistical analysis of the questionnaires and data sorting, I have summarized a series of reading preferences of college students:

30% like to read literature books;

27% like to read entertainment books;

20% like to read applied technology books;

15% like to read professional books;

8% like to read popular science books;

Suggestion: College students should read more books on party history education, so that they can become the pillars of the country.

[试题二]

根据要求写作文。

根据提示信息写调查报告,

The chart below illustrates reading preference based on a survey of 200 college students in 2016 in China. Write a survey report based on the given information. Your report should include:

(1) The subjects and respondents of the investigation.

(2) Analysis of investigation result.

(3) Your opinion or suggestions about college students' reading.

Words for reference:

娱乐类书籍 books for entertainment

应用技术 applied technology

专业用书 books relevant to their majors; professional books

科普读物 popular science books

参考答案:

Recently we have conducted a survey among 200 college students to find out their reading preference. As can be seen in the pie chart, 27% of the surveyed said they spent most of their time reading magazines and books for entertainment. What ranks the second are books of literature and applied technology, and they each account for 25%. The percentage decreases to 15% as to students who prefer to read books relevant to their majors, while only 8% tend to read popular science books during their spare time.

It should be noted that books of literature, applied technology, and entertaining books like magazines are main interests of college students. That's because these kinds of books are fun and easy to read; what's more, they bring students some cutting-edge information regarding books of applied technology. The percentage of students who like to read professional books is relatively lower maybe due to the reason that these books are hard to understand and time-consuming.

To sum up, the data reveals a serious problem that college students' reading preference stays at a relatively shallow level since the percentage of reading magazines exceeds that of literature and professional books. We

thus suggest that colorful reading activities like recommending great books be carried out to help students develop capabilities of appreciation and criticism.

根据要求写作文---[写一份公司英文简介]

[试题一]

Write a company profile according to the given information.(根据所给信息写一份公司英文简介)

公司名称:蓝米公司

- 成立于 2012 年 4 月的一家移动互联网企业
- 专注于高端智能手机、移动互联网产品的研发
- 吸纳人才,注重用户反馈
- 2015 年,其智能手机销量接近 7000 万部

参考答案:

Lanmi was founded in April 2012 by a serial entrepreneur, who believes that high-quality technology doesn't need to cost a fortune.

At Lanmi, we've brought together smart people from Google, King soft, Microsoft, Motorola, Yahoo, and other Internet and tech companies from around the world to bring that vision to life.

We create remarkable hardware, software, and Internet services for and with the help of our Lan fans. We incorporate their feedback into our product range, which currently includes Lan 4, Lan 3, Lan Pad, Lan Box, Lan TV, Lan 1S and Lan Note, Lan Power Bank and other accessories. We sell direct to customers to keep our prices competitive. And with nearly 70 million handsets sold in China in 2015 and products launched in Taiwan, Hong Kong, Singapore, Malaysia, Philippines, India and Indonesia, we are ready to go global.

根据要求写作文---[写一份英文产品说明]

[试题一]

根据要求写作文。

Please write a product description according to the given information.(根据以下信息写一份英文产品说明)

产品名称:扫地机器人

型号:Roomba790

基本功能:高度智能和自动化的扫地机器人。通过多个感应器和多种行动模式清洁房间。

特点:(1)高效能。160 分钟持续工作时间,是同类产品的 2 倍。
